Total Convictions	43,924	241.25	108	11.52

CHLs are 21 times less likely to commit a crime than the general public.

****Total population by age was not available when this analysis was prepared. To calculate the number of Texans age 21 years, the total population increase by percentage was applied to the 2013 population for those age 20 years. This number was deducted from the total for the 20 to 24 age group for 2015 to estimate the population for those age 21 to 24 years. 2015 population data was obtained from The Texas State Dept. of Health Services website set out below.**
