

School Property is only used for school purposes

Church Property is used primarily for Church Purposes but can at times have School Children on them, like Children from the School attending Mass in Church during School hours.

The Parish Hall is a Church Building that is a multipurpose use facility hosting various Church ministries and Church functions  
 The Parish Hall also has a dedicated office for the School K-1st grade, only open during school hours and is also a location that serves as a lunch hall K-1st grade students

It may be possible that this facility is used for School purposes but I have never seen it used that way.
